

Curriculum Vitae

Personal

Name, first name	Stokking, Rik
Address	4263 St. Urbain, apt 3 Montréal, H2W 1V6 Canada
Date of Birth	July 22, 1965
Place of Birth	Vlaardingen, The Netherlands
Status	Married
Children	2
Nationality	Dutch
Homepage	http://www.bic.mni.mcgill.ca/users/rik/rik.html

Education

August 1977	High School: Groevenbeek, Ermelo.
August 1983	Technical Physics, Technical University Twente.
August 1984	Medical Biology at the University of Utrecht. Project: "Percept of motion: Recruitment, interaction, or ..." under supervision of Prof. W.A. van de Grind, Comparative Physiology. Master's Thesis: "Quantitative Analysis of Doppler Blood Velocity Waveforms by means of a Personal Computer" under supervision of Prof. R.M. Heethaar.
September 1990	Military service as ROAG (second lieutenant) at the Institute of Environmental Health (RIVM), de Bilt. Study on Hantaanvirus.
November 1991	Clinical projects: "Segmentation and visualization of liver(veins) from MRI data" (1-3) and "Inventory of Abdominal Aortic Aneurysms using CTA data" (4). PhD. student at the Image Sciences Institute, University Medical Center Utrecht under the supervision of K.J. Zuiderweld and Prof. M.A. Viergever. Programme: "Integrated visualization of functional and anatomical medical data" (5-21).
April 1998	Postdoctoral Associate and Associate Research Scientist at Diagnostic Radiology, Yale Medical School, Professor I. George Zubal. Primary tasks: 3D visualization of SPECT difference data with MR images for epilepsy surgery (22-36), and interface final-report & patient images to the Neurology and Neurosurgery Groups in the Epilepsy Center. Other: - technical support for imaging, processing and visualization of the clinical data, - systems administrator for 5 Windows NT/ Linux PC's.
July 2000	Associate Research Scientist at the Brain Imaging Center of the Montreal Neurological Institute, McGill University, Montréal, Canada. Supervisor Prof. A.C. Evans. Primary tasks: Improve the Human (Digital) Brain Phantom and simulations, and (automatic) analysis of MRI brain data of 800 normals.
July 2001
